

# CBD & Dogs

What can CBD do for your dog?

## Anti-inflammatory

By activating TRPV-1 receptors CBD regulates pain perception, inflammation and temperature.

Since inflammation and swelling is the leading cause of joint pain, CBD are perfect for these types of conditions.

## Arthritis in Dogs

## Anxiety

Separation anxiety, fear of fireworks, and thunder are phobias which can be eased with the correct dosage of CBD.

Let's get something straight. CBD can not heal dogs from cancer, but it can certainly help reduce pain, increase appetite and stop seizures.

## Cancer

## Seizure

CBD have been shown to reduce and help manage seizures brought upon by epilepsy or other genetic disorders.
